EXPERIENCE

Jai Infoway Pvt. Ltd.   04/2023 - Present
Software Engineer

- After completing rigorous training in Node.js, Angular, and PostgreSQL, I was handpicked for Xinerva Technology's flagship stock market news platform, where I played a key role in building fast, responsive UI for real-time financial data.
- Stabilized Intellibooks Tech, an in-house restaurant and inventory management system, by upgrading **Node.j**s 10 → Latest, **Angular** 7 → 18 and ensuring functionality.
- Migrated all static assets to cloud storage and used public URLs to reduce local load
- Increased application performance by 30% through efficient database indexing and query optimization.
- Upgraded an outdated **React Native** mobile app (class component-based) by updating the SDK, implementing new features, and enhancing UI/UX.
- Developed and deployed restaurant management solutions, including: Web App (**Next.js, Node.js, PostgreSQL**) for table QR ordering; Website for remote ordering with **Strapi** for dynamic content. **Electron.js**-based desktop application for offline restaurant operations.
- Reduced bug occurrence by 40% by implementing **sentry**.
- Migrated deployments from **GCP** (GitLab CI/CD) → **AWS** EC2 instances and gained Docker experience while working on a serverless concept project.
- Contributed to GenAI Project, integrating AI-powered chatbots (LangChain, RAG Chatbot) with React, Node.js, and Python for advanced AI-driven interactions. And deployed to **AWS** EC2 using (**GitHub CI/CD**).
