SKILLS

Programming Languages

JavaScript, TypeScript, Python, PHP
and C#

Frontend Development

React.js, Next.js, React Native,
Angular, jQuery, AJAX and Tailwind
CSS

Backend Development

Node.js, Express.js, GraphQL,
ASP.NET Core and Laravel

EXPERIENCE

FULL STACK DEVELOPER LAUNCHX VENTURE PVT. LTD.
Jun 2025 - Current

(Projects across SaaS, FinTech, CRM, and AI Automation)

- Built **Voucher Zilla**, a digital voucher platform using **React.js, React Native, Node.js, and PostgreSQL**, where merchants can create and manage promotional offers, customers can discover and redeem vouchers through wallets and QR codes, and admins can manage users, merchants, transactions, and analytics.
- **Worked onsite in Dubai for 2 months** on a **Trading Broker Platform**, building critical modules using **React.js, Node.js, PostgreSQL, Prisma, and SQLite**, including: Trading account management Deposit and withdrawal systems CRM features for broker operations User onboarding and wallet management
- Architected **TripyVerse Travel Platform**
Travel platform with CRM, package management, referrals, wallet transactions, coupons, and dynamic itinerary.
- **AI-Powered Multi-Tool Platform**
Developing an AI-powered multi-tool platform for event scheduling, content generation, voiceovers, hashtags, and business workflow automation.
- Worked on **LaunchX Venture platform**, developing modules for: Business management user management and AI authentication custom business workflows.
- Stabilized and enhanced a **Laravel-based enterprise project** by: Fixing critical bugs Optimizing database queries Implementing additional custom features.

Databases

PostgreSQL, MySQL, SQL Server, MongoDB and SQLite

DevOps & Cloud

AWS EC2, AWS Lambda, Google Cloud Platform (Cloud Run, Cloud Build), Docker, CI/CD Pipelines, Serverless Architecture, Linux Server Management

Tools & Technologies

Git, GitHub, GitLab, Postman, VS Code, Electron.js, Strapi CMS, Sentry (Error Monitoring)

Testing Frameworks

Jest, Mocha, Chai, Vitest

AI & Automation

LangChain (RAG-based Chatbots), AI integrations with React, Node.js, and Python, AI-powered automation tools

DOMAIN EXPERTISE

- FinTech & Trading Platforms
- Restaurant POS & Inventory Systems
- CRM & SaaS Applications
- AI Automation & Chatbots
- Multi-tenant SaaS Architecture

KEY ACHIEVEMENTS

- Best Performer 2025
- Supper Squad Award 2022

- Developed a **WhatsApp chatbot using Python and FastAPI** to automate client communication, inquiry handling, and business workflow automation with **AiSensy**.
- Developed a **Python and FastAPI**-based image optimization tool to automatically resize and compress images, improving application performance and asset delivery speed.
- **Custom Trading Platform** – Admin & Manager Portal
Developed a custom trading platform similar to MT5 using .NET Core Web API, Next.js, and SQL Server. The system includes admin and manager portals for user management, trading account management, deposits, withdrawals, reporting, and complete broker-side operations.

SOFTWARE ENGINEER JAI INFOWAY PVT. LTD.
Apr 2023 - May 2025

- Upgraded and stabilized **Intellibooks restaurant & inventory system** (Node.js v10 → Latest, Angular 7 → 18).
- Improved application performance by **60%** through **database indexing and query optimization**.
- Migrated static assets to **cloud storage**, reducing server load and improving scalability.
- Modernized a **React Native mobile app** with SDK upgrades, new features, and improved UI/UX.
- Built full-stack restaurant solutions including **QR table ordering (Next.js, Node.js, PostgreSQL)**, **Strapi CMS website**, and **Electron.js desktop app** for offline operations.
- Reduced production issues by **40% using Sentry monitoring**.
- Developed a **React Native social app** with Google Maps, real-time chat, and FCM notifications.
- Contributed to a **GenAI project**, integrating a **LangChain RAG chatbot** with React, Node.js, and Python, deployed on AWS EC2.

SENIOR ITES EXECUTIVE IMERIT TECHNOLOGY SERVICES PVT. LTD.
Aug 2018 - Feb 2023

- Worked on **Proof of Concept** projects involving computer vision, machine learning, geospatial data, image annotation, and data analysis.
- Managed and reviewed datasets using **QGIS, Dataloop, V7, Python, and MySQL**, ensuring accuracy, quality, and timely delivery.
- Tested internal tools, identified bugs, reviewed basic code, and supported small feature improvements.
- Worked on **freelance** projects alongside my **B.Tech** in CSE, developing portfolio websites, business websites, and basic web applications using **JavaScript, React.js, Next.js, Python, and MySQL**
